How has Poland developed its solar industry?

The government has introduced several measures to promote the development of the solar industry, including feed-in tariffs, net metering, and renewable energy auctions. Furthermore, renewable energy auctions have driven Poland's solar industry's growth.

Should you invest in solar energy in Poland?

As you can see, more and more models allowing the use of solar energy are appearing on the Polish market. The market is highly flexible, which is worth bearing in mind when planning an investment. Renewable energy auctions are the only support scheme currently in place for new photovoltaic power plants.

What are the conditions for solar energy generation in Poland?

Poland has favorable conditions for solar energy generation, with a good amount of sunlight throughout the year. The government has introduced several measures to promote the development of the solar industry, including feed-in tariffs, net metering, and renewable energy auctions.

How much power do PV installations produce in Poland?

At the end of the first quarter of this year, the total power of PV installations exceeded 13 GW, with the share of prosumers being 74%, the share of small installations (50-1000 kW) 21%, and large PV farms 5%. The importance of energy from PV installations in energy production in Poland increased significantly.

How much solar energy is installed in Poland?

According to the European Commissioner for Energy report published at the end of August 2022, over 20 GW of renewable energy was installed in Poland. 11 GW came from solar installations. It's over 80% more than at the end of August 2021, when total solar capacity amounted to 6 GW.

Are solar panels a good idea in Poland?

Solar energy also has high public support in national polls. A survey commissioned by the Polish Photovoltaic Association in 2022 revealed that more than half of the Poles want solar installations in their neighborhoods, while 2 out of 5 respondents think installing solar panels on all buildings is a good idea.

Polish Photovoltaics Association is integrating the PV market in Poland, providing space for exchange of knowledge and establishment of new relations, and organising seminars and events. It is the host of the PV Congress -- the largest event of the PV industry in Poland.
