

The Advanced Modular Power Systems (AMPS) project is infusing new technology into power systems and components and proving their capabilities through exploration-based ground ...

With the broadest scope of precision power conversion, control, and measurement solutions and technical expertise across a wide range of applications, we are better-suited than ever to serve as a consultative partner for customers in Israel's leading technology centers.

AMRP - Advanced Modular Rotary Propulsion Ltd. A company based in Haifa, Israel, engaged in the design of 700 hp and more rotary (Wankel ) engines. The engines run on fuel, natural gas (CNG) and later on Diesel and Hydrogen. Recommended for UAVs. Electric Power Assist and ...

Advanced Modular Power Systems (AMPS) Project Managers, David Irimies and Ralph Jansen for project leadership. Study Team Leads, Raymond Beach, and James Soeder of Power Systems Branch for study guidance and power system insights. Monica Guzik, Brianne Scheidegger, Ken Burke, and Ian Jakupca for information on Non-Flow Through Fuel

This presentation provides an overview of the Advanced Modular Power Systems (AMPS) Project, along with sections to describe the three technical focus areas - Modular Power Electronics & Standards, Autonomous Power Control, and the Modular Power Testbed.

GG Ventures of the Carolinas led the formation of Advanced Modular Power Systems, LLC (AMPS), a new company designed to present alternative power supply sources, from concept inception to established operations in just under 12 months.

Projects and Programs Advanced Modular Power System (AMPS)/Gateway: Human Explorations and Operations. The Advanced Modular Power System (AMPS) project developed several electronic modules with various functions that can be combined to form modular electronics units (MEUs) that comprise various elements of an electrical power ...

Advanced Modular Power Approach to Affordable, Supportable Space Systems NASA/TM--2013-217813 June 2013 AIAA-2013-5253. NASA STI Program . . . in Profile ... Advanced Modular Power Systems (AMPS) Project Managers, David Irimies and Ralph Jansen for project leadership. Study Team Leads, Raymond Beach, and James Soeder of Power Systems ...

The AMPS unit is an HSSE friendly, efficient, and elegant alternative power source for all remote, high intermittent, and low constant e-power loads.

Safety approvals secured by Artesyn eliminate the need for an isolation transformer in medical equipment and the multi-output modular structure provides all system power in a single unit. The iHP power system also has industrial safety approvals and meets the SEMI F47 voltage sag tolerance standard for semiconductor processing equipment.

Our legacy stems from Arkel's global experience, operating hundreds of gen-sets for BP, Exxon Mobil and others. This experience gave us the insight and capability to design an alternative innovative power source for industry.

Advanced Modular Power Systems (AMPS) is excited to announce that our patented technology has successfully passed all factory acceptance testing and has completed rigorous field trials with 100% availability and reliability.
