

# Advanced thermovoltaic systems at French Polynesia

Advanced Thermovoltaic Systems (ATS) is revolutionizing the way industries manage waste heat, providing the world's first and only solid-state solution that converts industrial waste heat into clean, sustainable electricity without the need for turbines or moving parts.

Led by CEO Kelly Adams, US-based ATS has developed a scalable technology to capture waste heat from industry and turn it into electricity for the hard-to-abate ...

Advanced Thermovoltaic Systems (ATS) has developed a simple, safe, and scalable technology to capture waste heat and convert it into electricity, offering a game-changing solution for heavy industries like cement and steel production.

Advanced Thermovoltaic Systems (ATS) is revolutionizing the way industries manage waste heat, providing the world's first and only solid-state solution that converts ...

One of the 20 winners was the Advanced Thermovoltaic Systems (ATS) team, including Jake Perez, a RASEI alum. The ATS team was awarded the distinguished 2024 ...

ATS is the world's first and only solution for industrial waste heat--without a single moving part. It is a sustainable (99% circular) and cost-effective solution that produces electricity ...

Initially investigating advanced materials the company could use for solar panels, the Advanced Thermovoltaic Systems (ATS) team realised that its panels could ...

Led by CEO Kelly Adams, US-based ATS has developed a scalable technology to capture waste heat from industry and turn it into electricity for the hard-to-abate sectors, such as cement and steel production.

One of the 20 winners was the Advanced Thermovoltaic Systems (ATS) team, including Jake Perez, a RASEI alum. The ATS team was awarded the distinguished 2024 Earthshot "Fix Our Climate" prize for their transformative efforts against climate change.

Initially investigating advanced materials the company could use for solar panels, the Advanced Thermovoltaic Systems (ATS) team realised that its panels could generate electricity without light, only requiring waste ambient heat.

Advanced Thermovoltaic Systems is headquartered in Fort Collins, CO. What is the size of Advanced Thermovoltaic Systems? Advanced Thermovoltaic Systems has 10 total employees.

## Advanced thermovoltaic systems at French Polynesia

Advanced Thermovoltaic Systems (ATS) has been named one of three finalists for the \$1 Million "Fix the Climate" Earthshot Prize. The announcement occurred at the Earthshot Innovation Summit in New York.

ATS is the world's first and only solution for industrial waste heat--without a single moving part. It is a sustainable (99% circular) and cost-effective solution that produces electricity directly from waste heat.
