

# Affordable solar panels for home Yemen

What is the Yemen emergency electricity access project?

In June 2022, the Bank approved an additional US\$100 million for the second phase of the Yemen Emergency Electricity Access Project, which is designed to improve access to electricity in rural and peri-urban areas in Yemen and to plan for the restoration of the country's power sector.

How will a new electricity Grant help Yemenis?

The grant will provide 3.5 million people, of whom an estimated 48% (1,680,000) are women and girls, with new or improved services to electricity. It will also provide around 700 public services facilities and 100 schools with new or improved electricity services, helping Yemenis to have better access to critical services.

Why is Yemen a poor country?

Yemenis suffered from severe energy poverty, especially people living in rural areas and the poor, who accounted for about half the country's population of around 30 million. Since the conflict in Yemen widened in 2015, life has worsened in rural communities, where destruction did not spare the electricity sector.

The graduates of these training sessions then developed business proposals for community shops with affordable solar items, such as lanterns or charging equipment, and for solar micro-grids...

Fortune CP provides innovative renewable energy products and services in Yemen. These include solar components (solar panels, inverters, batteries), off-grid and grid-tie solar systems ...

Instead of diesel costing 42 cents an hour, solar energy costs only 2 cents, making it more affordable to the average Yemeni. Currently, UNDP's solar micro-grids provide a solution and hope for three frontline communities of the conflict in Hajjah and Lahj.

Beyond its immediate benefits of providing a clean, renewable, and affordable energy source, the solar power plant paves the way for long-term development. Access to reliable electricity is crucial for rebuilding infrastructure, reviving the economy, and improving the lives of Yemenis, especially those in rural areas currently lacking access to ...

Fortune CP provides innovative renewable energy products and services in Yemen. These include solar components (solar panels, inverters, batteries), off-grid and grid-tie solar systems for commercial, industrial and residential applications, battery energy storage systems, energy efficient LED lighting systems, solar water heating products ...

Between 2018 and 2022, the World Bank's Yemen Emergency Electricity Access Project (YEEAP), sought to leverage solar energy facilities to improve access to electricity in rural and peri-urban areas.
