

Ageto energy Laos

What is ageto energy?

To accelerate the adoption of renewable energy by simplifying the integration and control of off-grid and behind-the-meter power systems. What's in a Name? Ageto Energy was founded to simplify the task of integrating renewable energy into power systems. Our team has extensive experience in power management, renewable energy, microgrids, and SCADA.

What does ageto do?

We have developed and commissioned international power systems from 20 kW to 120 MW. By reducing system complexity and allowing renewable energy to be easily integrated into power systems, Ageto is enabling a low-carbon future that provides energy access for economic development.

How is ageto enabling a low-carbon future?

By reducing system complexity and allowing renewable energy to be easily integrated into power systems, Ageto is enabling a low-carbon future that provides energy access for economic development. Innovative and robust microgrid solutions: behind-the-meter solar and off-grid power solutions for a low-carbon future.

What is ageto arc?

Ageto ARC is an equipment-agnostic, elegantly integrated microgrid controller that's as reliable and robust as it is simple to manage. Really. Ask around. Talk to our partners. Review our projects. We know it's simple to talk a big game, hard to back it up. What is Title 24?

What technologies does ageto ARC manage?

Range of DERs managed - Ageto ARC has managed the following technologies: solar PV, lithium battery storage, iron flow batteries, vanadium flow batteries, hydrogen fuel cells, flywheels, wind generators, reciprocating diesel and natural gas generators, weather stations, protective relays, commercial/industrial/large residential loads.

The Ageto renewable energy controller (ARC) is an on-site microgrid controller, capable of managing grid services (such as energy arbitrage and demand charge management) and resiliency services/backup power for commercial and industrial projects.

Founder and CEO at Torpel, Entrepreneur, Battery Technology · Ph. D. in Chemical Engineering, Li-ion battery technology
Entrepreneur dedicated in
o 2-Volt rechargeable cells with ...

Ageto Energy was founded to simplify the task of integrating renewable energy into power systems. Our team has extensive experience in power management, renewable energy, microgrids, and SCADA. We are uniquely positioned to bridge the divide between renewable power technologies and conventional power generation.

Ageto energy Laos

Ageto's microgrid controller helps enable users to coordinate, optimize, and monitor all components of their microgrid from one simple interface. Combining Ageto's software solution with Generac's BESS and microgrid multi-asset systems provides site-level system integration and control versus hardware only.

Ageto Energy was founded to simplify the task of integrating renewable energy into power systems. Our team has extensive experience in power management, renewable energy, ...

The Ageto renewable energy controller (ARC) is an on-site microgrid controller, capable of managing grid services (such as energy arbitrage and demand charge management) and ...

Ageto Energy provides a software platform for off-grid and behind-the-meter microgrid system control operations. The offered product is called Ageto Renewable Controller (ARC) & can be used for real-time renewable power system control, user-level authentication, abnormal behavior notifications, spinning reserve & demand charge management ...

Ageto Energy provides a software platform for off-grid and behind-the-meter microgrid system control operations. The offered product is called Ageto Renewable Controller ...

Ageto Energy bridges the gap between renewable and conventional power generation resources with the Ageto Renewable Controller (ARC). Leveraging off-the-shelf SCADA software and ...

We have developed and commissioned international power systems from 20 kW to 120 MW. By reducing system complexity and allowing renewable energy to be easily integrated into power ...

Ageto's microgrid controller helps enable users to coordinate, optimize, and monitor all components of their microgrid from one simple interface. Combining Ageto's software solution with Generac's BESS and microgrid ...

Ageto's microgrid controller enables users to coordinate, optimize, and monitor all components of their microgrid from one simple interface. Ageto's software solution combined ...

Ageto's microgrid controller enables users to coordinate, optimize, and monitor all components of their microgrid from one simple interface. Ageto's software solution combined with Generac's BESS and microgrid multi-asset systems provides site-level system integration and control as compared to only hardware.

Ageto Energy bridges the gap between renewable and conventional power generation resources with the Ageto Renewable Controller (ARC). Leveraging off-the-shelf SCADA software and industrial hardware, ARC is a complete microgrid control solution that is ...
