

# Alaska solar Mali

Why should you choose Alaska solar?

Alaska Solar's mission is to make solar an easy investment. Through volume and quality we are creating more low cost and pollution-free energy. We are the installer making solar the new normal in Alaska. The cost of solar has decreased about 80% over the past 10 years. Meanwhile, your utility electric rates are increasing about 6% every year.

What is Kaba solar?

TO Kaba Solar: Illuminating Mali's Future! At Kaba Solar, we're on a mission to accelerate the adoption of solar energy in Mali. Our top-of-the-line solar equipment and expert installation services allow you to embrace clean, sustainable, and cost-effective solar power, while contributing to a greener planet.

Are solar panels tax deductible in Alaska?

Receive a dollar-for-dollar federal tax CREDIT (not a deduction!) equal to 30% of your total solar project cost including permitting, labor, materials, system monitoring and warranty services. The return on investment for systems in Alaska are 9-12%. That is as good or better than "traditional" investments with less risk and zero taxes.

How long do solar panels last in Anchorage?

Because panels last at least 30 years, a typical 3000 watt system in Anchorage will eliminate 100,000 pounds of carbon dioxide in its lifetime. That's the same as not driving an average car for 8 years! The grid is your battery so you don't need to install batteries in your home.

Does Alaska require electricity metering?

Alaska requires utilities to bill you monthly for the net between your production and your usage. This net metering means the electricity you produce is worth the retail rate if your array is sized correctly. A panel will offset its carbon cost in 6 months to 2 years. This is 50 to a 100 times better than when panels were first made in the 1970's.

Is Alaska a good investment?

The return on investment for systems in Alaska are 9-12%. That is as good or better than "traditional" investments with less risk and zero taxes. This does not include the added value to your property, which is equal to the cost of the installation. Alaska requires utilities to bill you monthly for the net between your production and your usage.

Alaska Solar's mission is to make solar an easy investment. Through volume and quality we are creating more low cost and pollution-free energy. We are the installer making solar the new normal in Alaska.

Alaska's net metering rule applies to systems 25kW or smaller and only for large utilities. Customers are paid
