What is Alterra Power Systems?

Alterra Power Systems is a company that provides backup power solutions for the utilities, telecommunications, transportation and government industries. With 45+ years of customer success backed up by Palmer Johnson Enterprises, Alterra is not an ordinary startup company.

Where does Alterra operate in Canada?

Alterra operates its wind and hydro facility farms in British Columbia, Canada. The company also operates its geothermal, wind, hydro, and power plant projects across Iceland, Canada, Chile, Italy, the US, Peru, and others.

Is Alterra a corporation?

Despite being legally recognized as a Trans-Gov, Alterra considers itself a corporation. Its corporate structure is made up of an elected board of directors that appoints the overall CEO, appoints the CEOs of major subsidiaries, and makes major economic decisions.

How does Alterra recycle plastic?

Alterra utilizes a scalable, patented, thermochemical liquefaction technology to process and recycle hard-to-recycle plastic, diverting millions of pounds of plastic from landfills. Its team of engineers, experts and partners are driven by one purpose: creating a cleaner planet for future generations.

What is Alterra pyrolysis based oil?

Alterra provides an innovative, patented, thermochemical liquefaction, converting hard-to-recycle plastic into pyrolysis based oil ("PyOil").

Why should you invest in Alterra?

Alterra is more than an investment venture; it's an invitation to be pioneers with us in a new climate capital landscape. We beckon investors, institutions, climate companies, and all those who want to build the new climate economy, to join us on a journey where returns on investment align with returns on the environment.
