

Can Angola achieve energy self-sufficiency?

Angola has everything it needs to achieve energy self-sufficiency through renewable sources - not only water, but also sun and wind. With these three natural resources, Angola could achieve the transition from oil and gas to renewable energies, and then boost its energy self-sufficiency.

Does Angola need solar energy?

Angola already boasts an impressive renewable energy component in its energy matrix, primarily derived from water resources. However, we recognise the potential for solar energy to complement this matrix and provide essential energy security.

Who are SSE energy solutions?

SSE Energy Solutions provides access to green energy straight from our UK wind farms for business and local authority customers. Set apart by their ability to innovate and create partnerships, they provide a growing suite of energy products and distributed energy solutions to support customers on the journey to net zero.

Should Angola invest in energy storage solutions?

With the ongoing solar projects under development in Angola with an installed capacity amounting to 500 MW, it is urgent to start thinking about efficient energy storage solutions. What structural challenges must be addressed for Angola to seize its renewable energy potential?

What is Angola towards an energy strategy?

Angola: Towards an Energy Strategy offers a realistic update on Angola's present-day energy situation and identifies the main priorities which could form the basis of an effective overall energy strategy. Angola: Towards an Energy Strategy - Analysis and key findings. A report by the International Energy Agency.

Can Angola deploy pumped-storage hydroelectricity & hydrogen solutions?

Fernando Prioste, CEO of COBA Group, talks to The Energy Year about Angola's potential for deploying pumped-storage hydroelectricity and hydrogen solutions as it develops a robust energy industry and the central role of COBA Group in the country's power arena.

Access to clean, modern, and reliable energy in Angola remains low - 33% countrywide, 69% in urban areas, only 6% in rural areas (IEA, 2016). As part of its long-term development strategy the Government of Angola (GOA) aims to expand electricity access to 60% of the population by 2025.
