

Ansell energy Australia

Who is Ansell energy?

Ansell Energy is at the forefront of the renewable energy revolution, seamlessly blending innovative solar origins with the dynamic world of battery technology. Founded in 2005 by the visionary Mr. L Ansell, our mission has always been to harness cutting-edge technology to provide sustainable, efficient power solutions.

How does Ansell's acquisition strengthen our position as a global safety solutions leader?

Discover how this acquisition strengthens our position as a global safety solutions leader. Integrating 14,000+ employees into a sustainable culture is vital. We use science, innovation, and collaboration with stakeholders to make necessary changes. Ansell employees play a key role in our sustainable business.

Will Ansell buy Murra Warra wind farm?

Ansell has already signed several PPAs for renewable energy, including a 10-year agreement with the Murra Warra Wind Farm in Victoria, Australia. Under this agreement, Ansell will purchase 10% of the wind farm's output, which is equivalent to around 24,000 MWh of renewable energy per year.

Why should you choose Ansell energy?

Moreover, Ansell Energy is built on a foundation of community and support, offering a network that empowers individuals through education, training, and growth opportunities. Our customer-centric approach guarantees satisfaction, with responsive support and tailored solutions to meet your energy needs.

Why is Ansell a good company?

Over the years, Ansell has invested in initiatives and capital to reduce its environmental impact and mitigate climate risks, with these efforts being recently recognised with a silver rating by EcoVadis.

What will Ansell do?

Ansell will focus on long-term decarbonisation efforts within its own operations, prior to exploring investing in credible and high-quality off-sets to address any limited residual emissions (less than 10%). Collaboration through value chain partnerships and policy advocacy.

Ansell's overarching decarbonisation strategy will encompass its end-to-end value chain and focus on: o Reducing its dependency on fossil fuels and shifting to renewable energy sources through direct renewable energy investments at some of its facilities as well as procurement of renewable energy through Power Purchase Agreements;
