The results demonstrated for Victoria are quite interesting - that is, a "big jump" from \$0.96 a watt in October to \$1.13 in November. According to SOLARQUOTES, this locates the average price of the average Victorian 6.6kW home solar system at approximately AUD\$7,500, including any applicable rebates and government incentives.

Your roof may fit 20kW worth of solar panels, but a cheaper 6.6kW solar system may be all you need. If you're trying to figure out what solar panels cost based on the right system size for your home try our free

Australia solar panel price for home

Solar Panel Calculator .

Solar thermal panels are less well known than traditional solar panel systems. Unlike solar PV which transforms the sun's energy into electricity using a generator, solar thermal energy heats up the water inside cylinders attached to your roof, which is then used to heat your home and water. Solar thermal systems can often provide anywhere from 40% to 90% of your ...
