

# Battery backup server Australia

What is a UPS battery backup?

When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment. APC, our flagship brand, offers UPS options for computers, peripherals, networks, servers, as well as data centres, and facilities. Need help choosing a UPS battery backup?

What is battery backup & surge protection?

Battery backup and surge protection for computers, home networking, external storage, gaming, home servers and more. Power availability and management for entry-level to high performance servers, storage, and business networking systems.

What is a user-replaceable battery?

User-Replaceable Batteries - Increases availability by allowing trained users to perform battery upgrades and replacements. Surge-Only Outlets - Protect secondary electronics from surges and spikes without reducing battery power used to run primary electronics during outages.
