Did EnerSys buy Bren-Tronics?

August 2, 2024: International battery company, EnerSys, announced on July 26 that it had closed the acquisition of Bren-Tronics, a manufacturer of portable power products for defense customers, including small and large format lithium batteries. EnerSys CEO David Shaffer had confirmed in early May that the acquisition was going to go ahead.

What is EnerSys doing about Ukraine?

David M. Shaffer, President and Chief Executive Officer of EnerSys, stated, "We are deeply saddened by the violence in Ukraine and stand firmly with the Ukrainian people. As the situation continues to unfold, our top priority is the safety of our employees in Ukraine and in Russia.

Why is EnerSys partnering with Bren-Tronics?

EnerSys CEO, David Shaffer said: "This is a strategic move that will strengthen our position as a critical enabler of energy transition and supports our growth in the attractive and growing military and defense end market. "Having partnered with Bren-Tronics to support the Department of Defense for over five years, we know the company well.

developed for fast and opportunity charging, NexSys™; TPPL batteries provide maintenance-free power for light to medium applications. using EnerSys™; advanced thin plate pure lead (TPPL) technology, NexSys TPPL batteries are designed to cut downtime and operating costs, as well as eliminate the need for battery watering and changing. request a ...

With the NorthStar acquisition, EnerSys has solidified its position as the market leader for premium Thin Plate Pure Lead batteries which are sold across all three lines of ...

EnerSys VBMS Battery Management System. VBMS is the definitive vehicle battery power solution allowing adjustable charging, power sharing and incorporates an integrated Datacell battery monitoring that provides data including: Battery Voltage, State Of Charge (SoC) (% Remaining), State Of Health (SoH) (% Remaining), Time To Run (Hours / Mins), Net Charge / ...

6.5 billion cell hours in space and counting. Pioneering EnerSys ABSL(TM) products are the space industry's most demonstrated Li-ion batteries. EnerSys ABSL(TM) supplied the longest operating rechargeable Li-ion battery in space, the first to orbit Earth, Mars and Venus, the closest to orbit the sun and trusted to power the James Webb Telescope.

NexSys battery chargers slash recharge times and allow for flexible opportunity charging while optimizing battery cycle life. Designed for wall-mounted or free-standing use, NexSys chargers feature our most compact size to date, automatic identification and switching of output voltage (within charger specification), increased
