

Who is Das energy?

Welcome to DAS Energy in Wr. Neustadt Our expertise lies in the field of green technology, with a clear focus on the development and manufacturing of lightweight and flexible photovoltaic modules.

What are Belgium's energy priorities?

Belgium is committed to working actively and constructively to finalize the ongoing legislative agenda and its legal-technical completion. Other energy related priorities for Belgium are: We aim to keep up the momentum of the energy transition through our combined presidencies: EU, Benelux and Penta.

How does Das energy support the HTL Rennweg project?

433 kWp large follow-up project with 1344 DAS Energy solar modules DAS Energy supports an innovative final project of the HTL Rennweg with photovoltaic modules. DAS Energy supports the successful sustainability concept of the paper plant company Papierwerke Klingele GmbH with 445kWp of solar energy.

Is there a single energy policy in Belgium?

There is no such thing as a single energy policy in Belgium; institutional reforms in 1980 transferred powers from the federal state to the regions, including energy. The Special Act of 8 August 1980 divides powers as follows: The federal state is responsible for the following matters:

Will Belgium have an electricity interconnection plan for 2030?

In relation to the internal market, Belgium will have already surpassed the electricity interconnection level for 2030, with a level of electricity interconnectivity of 21% in 2020. Nonetheless, the plan would benefit from including a concrete aim for 2030. Further concrete and quantifiable objectives could be
