

Bermuda mft energy

What is MFT energy's business model?

MFT Energy's business model is based on generating income from buying and selling power, gas and environmental, utilizing the volatility as best as possible. Our 2023-2024 growth strategy aims at capturing opportunities in existing markets, expanding into new geographies, and entering a new and related trading segment, environmental.

How does MFT energy work?

MFT Energy executes thousands of trades every day across markets, interacting with parties trading on energy exchanges. In 2023, more than 50% of our short-term trades across power and gas markets combined were executed using algorithmic trading. Algorithmic trading has allowed more complex trading strategies to thrive in the markets.

Why should you partner with MFT energy?

With MFT Energy's unique partner model, we empower entrepreneurs to become the best and make the most of their talent. We believe the most successful way to advance our business is to extend a sense of ownership to as many employees as possible.

What makes MFT energy a good trading company?

MFT Energy's trading teams have in-depth knowledge of the supply and demand dynamics in their respective markets and regions and are available for trading 24/7. The transformations in the energy markets require new data analytics and tools as well as trading strategies, as the number of products and opportunities increases.

Is MFT energy a risk management platform?

MFT Energy is built for all kinds of market sentiments - our trading engine is well prepared on a daily level for handling all market situations - but what we experienced in 2022 was extraordinary and, therefore, we have continuously invested in our risk management setup.

Who is MFT energy gas?

MFT Energy Gas was established in 2019 and during 2020 we increased the team from 2 to 8 full-time employees and at the same time we realized amazing results especially within physical gas. Our partner and business model makes us an attractive opportunity for talented traders.
