

The largest battery energy storage system (BESS) in Slovenia and the region was launched on Thursday at the Talum facility in Kidricevo, north-east Slovenia. The 15 MW, ...

Slovenia's NGEN first started utilizing Tesla Megapacks for energy storage and grid stabilization in 2019. The country became the first in the Balkin Peninsula to install a grid ...

Slovenia plans to provide individual grants of up to EUR25 million per beneficiary to encourage investment in ramping up clean energy projects. The aid package was approved under the EU's state aid temporary crisis and transition framework, designed to incentivize the production of equipment for the transition towards a net-zero economy.

A 10MW/50MWh battery energy storage system (BESS) spread across two substations in Slovenia has started a trial and testing period. The BESS projects are located at the Okroglo and Pektre substations and started their trial period this month, the company launching them announced.

We provide important information on all the ongoing battery energy storage system (BESS) projects in Slovenia, including project requirements, timelines, budgets, and key contact details to help you select the best business opportunities for your company.

The Slovenia project builds on three it already has operational there, totalling 20MWh, 30MWh and 40MWh, the first of which was built in 2019. These projects mainly provide secondary reserve ancillary services and cover 50-80% of the country's need there, Bernard told Energy-Storage.news.

In October 2020, the Slovenian energy solutions company NGEN launched the largest battery storage system (BESS) in Slovenia and the region at the Talum facility in Kidricevo, north-east Slovenia. The 15 MW, 30 MWh system was the second Powerpack installed by NGEN after a 12.6 MW, 22.2 MWh BESS was launched last autumn at the Acroni steel ...
