

This battery technology offers a sustainable and efficient energy solution for various sectors, including grid stabilization, renewable energy integration, maritime, and ...

Beyonder General Information Description. Developer of energy storage systems designed to provide sustainable battery cell technology. The company's products use sawdust converted into battery-grade carbon avoiding cobalt, nickel, and graphite starting with a high-power lithium fluorophosphate with fast charging, improved safety, and long cycle life providing attractive ...

HEROES X Beyonder = Innovative stationary storage systems ? Since May 2021, Beyonder has been the initiator and coordinator for HEROES H2020, a large EU-funded project focusing on developing ...

Years of groundbreaking innovation and lessons learned have positioned Beyonder to take the leap from an innovative start-up to a commercial leader in high-capacity battery technology, branded as BePowered.

Beyonder's hybrid battery cell technology is a more cost-effective and sustainable way to supply electric power for renewable energy grids, transportation and offshore energy infrastructure where high power and fast charging is needed.

Norwegian based battery technology company Beyonder has recently raised NOK 125 million from investors in support of its ambitious growth plans. With an increasing demand for storage technologies to integrate higher shares of variable renewable energy technologies to reduce the reliance on fossil fuels, the global stationary storage battery ...

On 30 October 2023, Beyonder, a Norwegian cell development and manufacturing company, launched it's first certified product "BePowered". It is a 31Ah (1C) lithium-ion pouch cell (detailed specifications found here), with ...

Beyonder's BePowered battery products deliver excellent power capabilities with extended cycle life and

Beyonder battery Norfolk Island

superior thermal properties. The batteries can be fully charged in 12 minutes and recharged over 10,000 times. Manufactured without critical substances like cobalt, these batteries use innovative and sustainable raw materials, resulting in ...

The battery cells are particularly useful in the energy intensive industry that needs high effects. Beyonder is today located at Forus in Rogaland where they have established a small-scale production line for the first battery cells. The decision today marks a significant step forward for the large-scale production of battery cells.

Finally, Beyonder has found their Chief Technology Officer, and his name is Dr. Han Ho Lee. - This is a huge milestone for us, says Beyonder's talent acquisition director, Runar Austrheim. - The entire world is now competing for world champion battery experts like this, and this appointment is p
