Could a new solar farm help bhp reduce scope 2 emissions?

A new solar farm in the Northern Goldfields has been switched online thanks to a collaboration between BHP and renewable energy provider TransAlta, which will help BHP reduce scope 2 emissions at its Nickel West northern operations by 12 per cent. 1

How many jobs will bhp's solar project create in the Goldfields?

The construction phase of the solar project has created more than 100 direct and indirect jobs in the Goldfields and Perth regions and is expected to produce its first solar power by the end of 2022. The first solar panels have started being installed this week at BHP's massive solar farm at Leinster Nickel Operation in the Northern Goldfields.

What is bhp & TransAlta's new solar facility?

This facility represents a first for both companies - it's BHP's first on-site, large-scale renewable project globally, and it's TransAlta's first renewable energy facility in Australia. It's also the first time we have combined solar and battery storage to offer a hybrid solution," he said.

Why are solar panels so popular in Switzerland?

Solar panels have become especially popular in industrial, commercial and service industry sectors. They now provide enough energy to power over 4.7% of Switzerland's entire energy consumption, up from 3.8% in 2019, Swissolar said in its annual report.

How many solar panels were put up in Switzerland in 2020?

Almost 50% more solar panels were put up in Switzerland in 2020 than in 2019, according to statistics released by the Swiss industry association Swissolar on Wednesday. Solar panels have become especially popular in industrial, commercial and service industry sectors.

Does BHP Nickel West have a wind farm?

BHP Nickel West Asset President Jessica Farrell said the initiative was one of many ways Nickel West was reducing its operational emissions - it was also considering wind farms in the northern and southern Goldfields. "It's fantastic to see the Northern Goldfields Solar and Battery Storage Facility switched on.

Solar batteries are snowballing in Switzerland as homeowners seek to increase the self-consumption of solar energy and gain greater energy independence. Pairing solar panels with batteries allows households to store excess solar ...
