Why should you choose solar World Botswana?

We offer top-notch solar solutions that are designed to perform reliably in all weather conditions, ensuring uninterrupted performance. Solar World Botswana is your ultimate destination for comprehensive solar energy solutions. Our mission at Solar World is to deliver dependable solar PV power plants that cater to all your energy requirements.

Why does Botswana need solar power?

Botswana is seeking a reliable and cost-effective electricity source, as hydropower is no longer viable due to droughts [Why does Botswana need solar power?]. To encourage the adoption of PV systems, Botswana imposes 20% import duties on solar lights and lanterns (and 5% on solar batteries), and offers net-metering for rooftop installations.

Which solar still is best suited for Botswana?

After years of research and development activities, the RIIC findings concluded that the Mexican and brick solar stills are the best suited for application in Botswana. The Mexican still consists of a moulded fibreglass basin of 1.6 m<sup>2</sup> base area to hold saline water and has gutters on two sides to collect the distillate.

What are Botswana's energy goals for the future?

Botswana encourages the uptake of PV systems through 20% import duties on solar lights and lanterns (and 5% on solar batteries) and net-metering for rooftop installations. Botswana's strategic goals include having renewables make up 15% of the energy mix by 2030 and 50% by March 2036. To encourage the uptake of PV systems, Botswana enforces import duties on solar equipment and offers net-metering for rooftop installations.

Does Solar World Botswana have a water system?

Solar World Botswana successfully revitalized and rejuvenated the water system at a resort farm located in Ranaka.

Why do we need a borehole in Botswana?

This borehole, which extends to a depth of 75 meters, plays a pivotal role in supplying water to a community situated about 3 kilometers uphill, where it is of utmost necessity. Thanks to the unwavering dedication of Solar World Botswana, this essential community requirement is now effectively met. Loading...

Botswana is on the cusp of becoming a significant player in the global renewable energy landscape, thanks to its abundant solar resources. With over 3,200 hours of sunshine per year, the country boasts an average insolation of 21 Megajoules per square meter on flat surfaces.
