This profile provides a snapshot of the energy landscape of the British Virgin Islands (BVI), one of three sets of the Virgin Island territories in an archipelago making up the northern portion of the Lesser Antilles.

The longer-term goal is for us to get to around 70-80 percent renewable energy across all of the Virgin Islands, and this is a major step forward. This project will reduce diesel produced electricity on Anegada by 90-95 percent.

Honeywell announced it will provide VIElectron, a CB Loranger Company, its first installment of battery energy storage solutions (BESS) to six solar parks strategically positioned across the U.S. Virgin Islands.

Energy Snapshot - British Virgin Islands Author: Victoria Healey, Laura Beshilas, and Kamyria Coney Subject: This profile provides a snapshot of the energy landscape of the British Virgin Islands (BVI), one of three sets of the Virgin Island territories in an archipelago making up the northern portion of the Lesser Antilles. Created Date

Il s'ajoute au portefeuille de projets de stockage d'énergie par batterie de Boralex, qui comprend les projets de Hagersville (300 MW) et Tilbury (80 MW), sélectionnés par la SIERE dans le cadre de l'appel d'offres de l'an dernier.

The British Virgin Islands Electricity Corporation (BVIEC) and Power52 executed the contract for the Anegada Hybrid Renewable Energy & Battery Storage System (BESS) Project in November 2021 in the sum of \$4,687,944.72.

The Government of the Virgin Islands has signed an agreement for the Anegada Microgrid project, which will introduce renewable solar energy to the island. Read more about Contract Signed For Renewable Energy On Anegada
