Distributed generation solar; floating solar for grid and green hydrogen; carbon as a business (carbon capture centre); and electric vehicles are four solutions that the Sultanate can focus on for its energy transition to ...

Head of Energy Transition Division at the Department of Energy, Prime Minister's Office Shirley Sikun said Expro Brunei's solar panels installation sets an example ...

Being the world's first designated battery (electrode) foundry company and as a strategic partner, JRES supports clients' growth in the battery market by providing high-quality electrodes, sharing advanced production data through AI solutions as well providing a turnkey solution for establishing electrode manufacturing facilities when needed.

Brunei now has two options: significantly expand solar energy for the production of green hydrogen, or invest in carbon capture with the goal of either storing the CO<sub>2</sub> or separating out the carbon for industrial uses.

JR Energy Solution provides the total smart factory system specialized in the battery system including electrode manufacturing, cell assembly, modules, and packs. We analyze the initial product, design a manufacturing plant including the logistics flow mechanism, analyze the production requirements (specification), identify the overall process ...
