Build customized Bluetooth Low Energy projects that make your web or mobile apps smarter in terms of networking and communications. Using Android, iOS, and the Web, acquire key skills to harness the power of Bluetooth Low Energy in your IoT applications.

Building bluetooth low energy systems Mozambique

The author gives an introduction to the bluetooth technology and guides the user how to build systems. In my case it is android and by the look of it, he gives enough API details to get started (comparable or more than what I found in similar books).

You will learn to implement customized projects for Peripheral/Central communication, BLE Beacons, indoor navigation using triangulation, and the Internet gateway ...
