How to contact solar energy company in Cambodia?

For Business: For Business inquiry fill our feedback form or call Number +855 92-962-162. since 2006. providing solar technologies on a large scale. 15 Years of Experience in Solar Energy in Cambodia. International and professional team adapted to your needs. System designed with European technology. us Special? Have a Questions? Call Us

Does Cambodia have solar power?

Solar power capacity has been on a sharp ascent in Cambodia recently, increasing at a 10% annual rate from less than 1% of national generation capacity, however. Some 400-MW of solar-fueled power capacity is now connected to the national grid, according to the Department of Mines and Energy.

Will Cambodia invest 210 billion in solar energy by 2043?

Phnom Penh, Cambodia - The Cambodian government has announced a historic investment plan in solar energy projects worth over 210 billion baht by 2043. This is part of its Power Development Masterplan (PDP) to transition the country towards clean energy and reduce carbon dioxide emissions.

Why are Cambodians investing in solar energy?

Cambodian households and businesses are also increasingly investing in behind-the-meter (BTM) solar energy systems as they're much easier and faster to deploy and costs are lower than utility grid rates, market analysts highlight. Photovoltaic electricity potential in Cambodia. 2017 The World Bank, Solar resource data: Solargis.

Can solar power help Cambodia achieve national electrification goals?

Searching for alternative options, Cambodia joins a growing list of national governments who have come around to seeing solar and other distributed, emissions-free renewable energy resources as a cost-effective means of achieving national electrification, as well as national and international climate change and renewable energy goals.

How many energy projects are coming to Cambodia?

The Cambodian Cabinet approved four energy projects this past April, a US\$231 million hydroelectric power and three solar power projects with a combined, rated, maximum power capacity of 140 MW. The latter are expected to come online and dispatch power to the national grid by 2020 and 2021 in four different provinces.

In our opinion, Cambodia has an opportunity to go beyond its renewable energy strategies to benefit from its unique location between the two leading Greater Mekong Subregion (GMS) economies and to position itself as a leader in green business.

We can help realise the goal of affordable and reliable power provision for all of Cambodia's energy users,
