

Can I use facial scanning in the lockers

How secure is facial recognition?

As the most secure practical form of authentication available today, facial recognition elevates the security of any access control system. Thanks to the high accuracy and flexibility of FaceMe, one can easily integrate facial recognition into existing systems or install it as a standalone solution.

Is facial recognition legal in the UK?

Is the use of facial recognition technology legal in the UK? There is no specific facial recognition law in the UK, however, the Information Commissioner's Office has set out specific responsibilities in the Data Protection Act 2018 and other legislation.

What do controllers need to know about live facial recognition?

The Information Commissioner's Opinion also highlighted that controllers seeking to deploy Live Facial Recognition must: Comply with all relevant parts of the UK General Data Protection Regulation and Data Protection Act 2018. This includes the data protection principles: Identify a lawful basis and meet its requirements.

Why should you use facial recognition in a touchless access control system?

However, using fingerprints or iris recognition increases visitor surface contact. Facial recognition requires no personal contact, making it ideal for building a touchless access control system, thus maintaining workplace health and safety. 1. User convenience Your face is your ID!

What if a person is misidentified by facial recognition software?

Anyone who believes that they have been misidentified by the facial recognition technology or believes that their image has been taken unlawfully should seek legal advice and contact the Information Commissioner's Office. Where does the law stand on the use of facial recognition software?

Are facial recognition cameras snooping on people?

Facial recognition cameras have been installed quietly across the country, which has sparked controversy amongst privacy campaigners and the public who are unsure about the growing use of facial recognition technology. These devices are just the latest additions to a growing system of increasingly intrusive snooping on the population.
