

Cayman Islands' first commercial solar power project

What is the first commercial solar project in the Cayman Islands?

The 5MW Solar Farm is the first commercial solar project in the Cayman Islands. It was completed and commissioned in June 2017 and is located on a 20-acre site in Bodden Town, Grand Cayman. The Farm comprises 21,690 poly-crystalline photovoltaic (solar) modules each with a DC-rated capacity of 305 watts.

What are the benefits of solar power in the Cayman Islands?

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO₂ per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of 110 MW.

How can the Cayman Islands build climate resilience?

With a target of 70 percent renewable energy by 2037, the Cayman Islands is seeking to build climate resilience by purchasing clean energy for its electricity supply. The country established its first utility-scale solar project in 2017 through a power purchase agreement with renewable energy generated from the Bodden Town Solar Farm.

How does CUC power a solar power plant in Grand Cayman?

The fuel is transferred by pipeline from suppliers' tanker terminals to CUC's centralised generating Power Plant located on the outskirts of George Town. In 2017, CUC commissioned Grand Cayman's first commercial solar project.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

Why did Bodden Town solar move to the Cayman Islands?

The original developers of the Bodden Town Solar facility sought to exit the Caribbean market once the plant entered service. BMR seized the opportunity to establish operations in the Cayman Islands, expanding the footprint of its business and positioning itself for further growth in this important market.

Power Purchase Agreement (PPA) proposed by Caribbean Utilities Company, Ltd. (CUC) for a 5 megawatt (MW) plant to be built by Entropy Cayman Solar Limited in the district of Bodden ...

Entropy Cayman Solar Limited ("Entropy"), has established a 6.335 MW (dc), 5 MW peak capacity utility-scale grid-connected solar photovoltaic (PV) power plant at Block 43A Parcel 346 in ...

Cayman Islands cordon solar power project

BMR Energy will take over all operations of the solar plant and the purchase power agreement (PPA) with Caribbean Utilities Company (CUC). The park was previously owned by Entropy Cayman Solar I. Built on a rock ...

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO₂ per year. Serves ...

Caribbean Utilities Company hopes to build as many as six major solar farms in an effort to slash Cayman's carbon emissions, meet renewable energy targets and cut the cost of electricity ...

The Cayman Islands should meet all of its electricity demands from renewable sources by 2050, according to an ambitious new draft of the National Energy Plan.

The Lake Destiny 5MW Solar Farm is the first utility-scale, commercial solar project in the Cayman Islands. It was completed and commissioned in June 2017 and is located on a 20-acre site in Bodden Town, Grand Cayman. The Farm comprises 21,690 poly-crystalline photovoltaic (solar) modules each with a DC-rated capacity of 305 watts.

New solar farms are planned on Cayman Brac and Little Cayman as the Sister Islands take their first steps towards a renewable energy future.

Caribbean Utilities Company hopes to build as many as six major solar farms in an effort to slash Cayman's carbon emissions, meet renewable energy targets and cut the cost ...

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO₂ per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of ...

The 5MW Solar Farm is the first commercial solar project in the Cayman Islands. It was completed and commissioned in June 2017 and is located on a 20-acre site in Bodden Town, ...

The 5 MW Solar Farm is the Island's commercial solar project, located on a 20-acre site in Bodden Town, Grand Cayman. This solar farm was also the first Independent ...
