

Does Ceeg improve seizure detection in critically ill adults?

**Conclusions and Relevance** This pragmatic trial shows that in critically ill adults with impaired consciousness and no recent seizure, cEEG leads to increased seizure detection and modification of antiseizure treatment but is not related to improved outcome compared with repeated rEEG.

Is Ceeg better than Reeg?

The fact that disability (mRS) evolved more favorably in survivors without cardiac arrest undergoing rEEG seems to counterbalance the mortality tendency. This trial confirms that cEEG leads to increased detection of ictal and interictal EEG features than rEEG, even excluding patients with recent seizures or SE.

What does Ceeg stand for?

Continuous electroencephalography (cEEG) monitoring and outcomes of critically ill patients. Med Sci Monit. 2017;23:649-658. doi: 10.12659/MSM.900826 PubMed Google Scholar 17. Eskioglu E, Strohli C, Rossetti AO, Novy J. Extended EEG and non-convulsive status epilepticus: Benefit over routine EEG?

Why should you choose Ceeg?

We are committed to delivering exceptional support to our customers, empowering them to successfully execute their projects with confidence and efficiency. CEEG is dedicated to promoting Chinese brands and expanding its global presence, with an impressive portfolio of over 400,000 transformers operating reliably on the grid.

Who is China electric equipment group (Ceeg)?

Founded in 1990, China Electric Equipment Group (CEEG) is a leader in the global energy revolution, dedicated to "Delivering Premium Power to the World." As a tech-driven enterprise, we specialize in advanced transformers, solar energy storage systems, intelligent distribution networks, and hydrogen energy technologies.

What is the mortality rate for Ceeg and Reeg?

At 6 months, mortality was 89 of 182 in those with cEEG and 88 of 182 in those with rEEG (adjusted relative risk [RR], 1.02; 95% CI, 0.83-1.26; P = .85).

7 Mayotte's 320,000 residents were ordered into lockdown Saturday as cyclone Chido bore down on the islands around 500 kilometres (310 miles) east of Mozambique, with gusts of at least 226 ...

In critically ill patients with altered consciousness, continuous electroencephalogram (cEEG) improves seizure detection, but is resource-consuming compared with routine EEG (rEEG). It is also uncertain whether cEEG has an effect on outcome.

It reveals similar long-term mortality in critically ill adults with altered consciousness without recent seizures randomized to repeated rEEG or cEEG, despite higher detection of ictal and interictal ...

At the time of final analysis, a total of 234 patients receiving cEEG were enrolled (cEEG group; cases) and matched to 234 patients who did not receive cEEG (non-cEEG group; controls). Enrollment of new subjects was halted when the first 200 subjects in each group were completed.
