

Cleaning solar panels

How to clean solar panels?

Step 2: Choose the best approach: If your solar panels are on the roof, consider using a telescopic window cleaning pole to clean them from the ground instead of using a ladder. Step 3: Mix your cleaning solution: In a bucket of warm water, mix a small amount of mild detergent or use a specialised pre-mixed solution.

Do solar panels need to be cleaned?

Cleaning may even be in the terms of your solar panels' warranty. However, we're not about to send you up a ladder with a bucket of water slung over your arm. Hiring a professional solar panel cleaner is the best way to give rooftop panels a really thorough cleanse, but you can do a basic clean from the ground with not much more than a garden hose.

How do I know if my solar panels need maintenance?

Monitor performance: Regularly check the performance of your solar panels to detect any significant drops in energy production, which might indicate the need for cleaning or maintenance. Most systems have a monitoring feature, and many newer systems include apps to track output.

How often should you clean solar panels?

Most systems can be cleaned from the ground using a long-handled brush, reducing risk. If you can't reach the panels safely or are unsure about the process, hire a professional, as annual cleaning is typically sufficient. Optimal timing: Clean your solar panels in the early morning or late afternoon when they are cooler.

How much does it cost to clean a solar panel?

Cleaning solar panels is pretty straightforward, but there are several reasons you may not clean them yourself, including safety concerns, physical limitations, or time constraints. On average, it costs \$25 per solar panel for a professional cleaning, or \$150 for a cleaning and inspection bundle.

How do you clean ground-mounted solar panels?

However, some homeowners who have the space can install ground-mounted solar panels or position them on a shed or outbuilding. In order to clean these, one of the most common methods for cleaning solar panels is manual cleaning using water and a soft brush, sponge, or cloth.
