What is Crimson energy storage?

Image: Recurrent Energy. Project partners Canadian Solar and Axium Infrastructure have begun the operation of Crimson Energy Storage, a large-scale battery energy storage system (BESS) in Riverside County, California. California's Governor Gavin Newsom was among those celebrating the 350MW/1,400MWh project's inauguration.

Will Crimson be a battery energy storage project?

Once it reaches commercial operation, Crimson will be one of the largest battery energy storage projects in the world. We are pleased to work with Axium as we execute and complete the majority sale of the project." "The Crimson partnership with Canadian Solar and Recurrent marks Axium's first investment in battery storage.

What is crimson storage?

Dr. Shawn Qu, Chairman and CEO of Canadian Solar, said, "Crimson Storage is now the largest single phase energy storage project to reach commercial operation in the world and the second largest operating standalone energy storage projects in the world.

Who owns Crimson storage?

GUELPH, Ontario, October 18, 2022 - Axium Infrastructure ("Axium") and Canadian Solar Inc. 's ("Canadian Solar") (NASDAQ: CSIQ) subsidiaries Recurrent Energy and CSI Energy Storage, today announced that Crimson Storage, a 350 MW /1400 MWh standalone energy storage project, is now in operation and providing flexible capacity to the California grid.

Where is the Crimson energy storage project located?

The entire project includes approximately 2,000 acres of BLM-managed land, located 13 miles west of Blythe in Riverside County. The Crimson Energy Storage Project is in an area analyzed and identified as suitable for renewable energy development as part of BLM's Desert Renewable Energy Conservation Plan Land Use Plan Amendment.

When will the Crimson storage project start?

Construction of the storage project will begin in Q3 2021 and is expected to reach commercial operation by the summer of 2022. The Crimson storage project is Canadian Solar's first stand-alone storage project and the largest developed to-date. It holds two energy storage contracts with local utilities, namely:

Crimson Storage will operate under two long-term contracts with utilities in California. Specifically, a 200-MW/800-MWh portion is under a contract spanning 14 years and 10 months with Southern California Edison (SCE), while 150 MW/600 MWh is tied to a 15-year contract for resource adequacy only with Pacific Gas and Electric (PG&E).
