Investing in solar power infrastructure can help to make Africa great again, by providing the energy needed to power homes, schools, hospitals, and businesses, and by creating jobs and ...

Mali's President Assimi Goita has launched a 200 MWp solar power plant project with NovaWind, a Rosatom subsidiary, to address the nation's electricity crisis and promote sustainable energy. The EUR200 million investment aims to supply 10% of Mali's electricity within 12 months.

According to the International Renewable Energy Agency (IRENA), Mali boasts significant solar power potential, particularly in its northern regions, where annual sunshine hours exceed 3,000 hours. This abundant sunlight provides a strong natural foundation for the implementation of solar energy projects. Despite this vast potential, Mali's renewable energy market is still in its early ...
