According to USAID's Energy sector overview for Djibouti, Djibouti has the potential to generate more than 300MW of electrical power from renewable energy sources, and much more from other resources. Based on 2020 data, Djibouti's national electrification rate reached 42%, (1% in rural areas, 54% in urban areas).

By harnessing energy from renewable sources, Djibouti can reduce poverty without depleting its forests or relying on imported coal or oil. By becoming the first African country to use 100 percent renewable energy, Djibouti has the opportunity to become a leading international voice in sustainable development.
