

Will ecobatt build a lithium-ion battery recycling plant in Australia?

Ecobatt has announced it plans to spend USD30 million building a lithium-ion battery recycling plant in Victoria, Australia.

Will Guernsey's new electricity strategy come after a long-term deal?

A leading businessman has criticised Environment and Infrastructure's (E&I) new electricity strategy for Guernsey. Jon Moulton said the strategy should come after a long-term deal on power supply has been signed with French energy suppliers. The current deal for electricity supply with French energy supplier EDF is set to run out in 2027.

Who is ecobat resources?

Ecobat Resources is the leader in the responsible recycling and production of resources essential to modern life. Backed by an international network of smelters, we are the world's largest producer of lead and lead alloys used in energy storage solutions and a range of other industrial and commercial applications.

How does Guernsey get its electricity from France?

Mr Moulton, from the centre-right think tank the Guernsey Policy and Economics Group (GPEG), said: "You cannot decide on a strategy until you've worked out what our French supplier wants to do." Currently around 93% of Guernsey's electricity is sent through a cable via Jersey, from France.

Who is ecobat?

Ecobat is a world leader in the production of lead, lead alloys, and the recycling of lead batteries. Our vast network features 11 smelters across two continents with an average annual output of 840,000 tons of lead. Our production is matched by our lead recycling system which allows us to recover and repurpose over 99% of the metal.

Is E&I planning a small windfarm off Guernsey?

Paul Fletcher, from renewable energy company Renew Guernsey, is also concerned about the direction chosen by E&I. He said the E&I proposals for a small windfarm off Guernsey would be very expensive, and in his opinion "not a good idea".
