

European Energy, a global leader in renewable energy development, is ready to start construction of its first solar park in Latvia. This ambitious project, spanning 138 hectares ...

Set to become one of the largest PV farms in Latvia, the new plant is expected to start feeding power to the grid by the end of next year. The capacity will be installed near ...

Iepazīstiet Solar Energy Latvia, kas ir labākais saules enerģijas iekartu piegādātājs un uzstādītājs Latvijā. Musu uzņēmums tika dibināts 2020. gadā, kad musu dibinātājs Edgars Perkons pamanīja, ka pastāv plaša starp nozares vajadzībām un piegādātāju piedāvājumu.

ST Board Chairman Sandis Jansons said that solar power has been a notable addition to the country's total energy portfolio in recent years - solar panels generated more than 128 gigawatt hours (GWh) of electricity in 2023. In Latvia's total electricity production balance, it is still a small part - about 2%.

Set to become one of the largest PV farms in Latvia, the new plant is expected to start feeding power to the grid by the end of next year. The capacity will be installed near the village of Targale in western Latvia's Ventspils County and is expected to generate about 154,550 MWh of electricity annually.

Renewable energy developer European Energy has announced plans to build a 110 MW solar park in Targale, Ventspils region. This will be European Energy's first project in Latvia and the largest solar park in Latvia.

To date, Latvia has lagged behind its neighbors in the construction of solar energy parks. In 2023, Estonia's solar power capacity reached 822 MW, Lithuania's 1,165 ...

Construction of solar power plant Kalkunes SES started in October 2023 and was completed in April 2024. Plant is located right near Daugavpils, second largest city of Latvia, ...

ST Board Chairman Sandis Jansons said that solar power has been a notable addition to the country's total energy portfolio in recent years - solar panels generated more ...

European Energy has begun constructing Latvia's largest solar farm, boasting a capacity of 148 MW and featuring 240,000 solar panels. The solar farm will produce around 154,550 MWh annually to power approximately 40,000 households, supporting Latvia's energy independence and renewable energy goals.

Latvia recorded 54 MW of installed solar capacity at the end of last year, according to International Renewable Energy Agency (IRENA) statistics.

To date, Latvia has lagged behind its neighbors in the construction of solar energy parks. In 2023, Estonia's solar power capacity reached 822 MW, Lithuania's 1,165 MW, while Latvia's stood at only 500 MW. The new European Energy project will significantly boost Latvia's solar energy generation, strengthening its position in the ...

European Energy, a global leader in renewable energy development, is ready to start construction of its first solar park in Latvia. This ambitious project, spanning 138 hectares in Targale, Ventspils county, will boast a substantial capacity of 148 MW, making it one of the largest solar parks in the country.
