

Mit der Princess Elisabeth Antarctica hat die belgische Regierung ein weltweit einzigartiges Vorzeigeprojekt für die erneuerbaren Energien geschaffen. Weitere Infos zum ...

Marcel Macke, Key Account Manager at the Austrian heat pump producer iDM Energiesysteme GmbH, spoke in Kassel about energy management of heat pump solutions in ...

Marcel Macke, Key Account Manager at the Austrian heat pump producer iDM Energiesysteme GmbH, spoke in Kassel about energy management of heat pump solutions in combination with photovoltaics. iDM produces heat pump systems from 2 to 1,500 kW.

By collecting the latest data available on renewable energy deployment in Antarctic stations, this article provides a snapshot of the progress towards fossil fuel-free facilities in the Antarctic, ...

Mit der Princess Elisabeth Antarctica hat die belgische Regierung ein weltweit einzigartiges Vorzeigeprojekt für die erneuerbaren Energien geschaffen. Weitere Infos zum Projekt: bzw.

KWB Energiesysteme GmbH office@kwb +43 3115 6116 +43 3115 6116-4 Industriestraße 235 A-8321 St. Margarethen/Raab Österreich KWB is the premium provider for efficient energy systems and offers customized comprehensive solutions for renewable heat & electricity. We help ensure the energy transition in your home. ...

A feasibility study on the topic of expanding renewable energies in Antarctica at Neumayer Station III (NM3) has been conducted. Today, the station is mainly operated with ...

KWB Energiesysteme, with its headquarters in the Styrian town St. Margarethen an der Raab, has evolved from a pioneer in modern wood-based heating systems to a leading provider of comprehensive solutions for heat and electricity from ...

Die SES Energiesysteme GmbH, Spezialist im Bereich dezentraler Energiesysteme, hat für die Antarktis-Forschungsstation "Neumayer III" ein Blockheizkraftwerk (BHKW) entwickelt, das die Station mitten im Ekström-Schelfeis störungsfrei mit Strom und Wärme versorgt.

By collecting the latest data available on renewable energy deployment in Antarctic stations, this article provides a snapshot of the progress towards fossil fuel-free facilities in the Antarctic, complementing the data published in the Council of Managers of National Antarctic Programs (COMNAP) Antarctic Station Catalogue (COMNAP 2017). In ...

KWB Energiesysteme, with its headquarters in the Styrian town St. Margarethen an der Raab, has evolved from a pioneer in modern wood-based heating systems to a leading provider of comprehensive solutions for heat and electricity from renewable energies.

Die SES Energiesysteme GmbH, Spezialist im Bereich dezentraler Energiesysteme, hat für die Antarktis-Forschungsstation „Neumayer III“ ein Blockheizkraftwerk (BHKW) entwickelt, das die ...

The Australian Antarctic Division worked closely with German turbine manufacturer, Enercon, and Australian company, Powercorp, to design a high penetration ...

A feasibility study on the topic of expanding renewable energies in Antarctica at Neumayer Station III (NM3) has been conducted. Today, the station is mainly operated with polar diesel in combination with combined heat and power plants, resulting in high CO₂ emissions (714 t/a). By mapping the station in the simulation program TRNSYS ...

The Australian Antarctic Division worked closely with German turbine manufacturer, Enercon, and Australian company, Powercorp, to design a high penetration renewable energy solution for Mawson, sized to allow operation of the station, free of fossil fuels.
