

This initiative, with the full backing of the Environment and Ecology Bureau and the Environmental Protection Department (EPD), not only provides a sustainable, low-carbon ...

Hong Kong and Lamma Islands, we plan to install additional solar panels on the roof-tops of our facilities and office buildings by 2023, which will provide an extra installed capacity of 1.2 MW. We are also exploring options for large-scale local RE generation, including construction of an offshore wind farm located southwest of Lamma Island.
