Impacts that compound year over year. Introducing the Energybox Impact Platform™. A proprietary network of sensors, controls and software designed to collect and process data from areas previously out of reach, producing brand new operational insights.

Can you see Bouvet on a cruise ship?

The short answer is, you can't. Short of scientific study or a private ship, the only way to see Bouvet is from one of the very few cruise ships that sail nearby. Cruise ships that sail to Antarctica do not typically call at Bouvet due to the vast distances involved.

At that point, the island was given its current name of Bouvet Island ("Bouvet's" in Norwegian). [6] In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it ...

OverviewHistoryNorvegia StationGeography and geologyClimateNaturePolitics and governmentSee alsoBouvet Island is an uninhabited subantarctic volcanic island and dependency of Norway. It is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island. Located north of the Antarctic Circle, Bouvet Island is not part of the southern region covered by the Antarctic Treaty System.

It's almost impossible for humans to visit Bouvet Island bar the occasional scientific expedition. Yet life exists here. Penguins and many species of Antarctic seabirds are among the species to call Bouvet home.

The island was rediscovered in the early 19th century. It was so far away from Bouvet's reported position, though, that those who saw it thought it was a completely different island. It took a while to reconcile Bouvet's report with the others. Today, the island is owned by Norway, which maintains it as a nature reserve.
