

Exhaust equipment Fengwang generator

Who designs and installs a generator exhaust system?

The proper design and functionality of a generator exhaust system falls on the responsibility of the engineering firm of record. If a field fabricated system is being utilized, the design and installation of the system must be a collaboration between the engineering firm and the installing contractor.

How do generator exhaust systems work?

Units located inside a building often require the exhaust to be routed up through the roof, up the side of the building, or to a free-standing stack. Generator exhaust systems for years have been fabricated from sections of schedule 40 carbon steel pipe that are field welded, then insulated to reduce surface temperatures.

What is a generator exhaust?

A generator exhaust is a system designed to direct the fumes and output away from the engine or a diesel generator or petrol generator. It also helps to direct the heat away from the engine, preventing overheating. Exhausts ensure the proper and efficient working of your generator.

Why do generator exhaust systems need to be properly designed?

Generator exhaust systems need to be properly designed to ensure correct engine performance and safe operation. System design has become more complex with the desire to keep emissions low, along with the desire to utilize the heat energy in the exhaust gas.

Does mulmuf manufacture exhaust systems?

Mulmuf produces Exhaust Systems for all your generator needs. Our design engineers can pre-design your Silencers and Pipe work requirements. All our silencers are custom built to fit engines ranging from 10 KVA to 2500 KVA. Silencers can be Industrial or Residential.

Why should you choose a prefabricated generator exhaust system?

Let us show you how. Prefabricated generator exhaust systems have emerged as the preferred choice over traditional field-welded assemblies. These systems offer significant advantages, including time savings, cost-effectiveness and enhanced safety when dealing with high temperatures and exhaust gas pressures.

We manufacture power generator silencers for Kohler, Generac, PSI, General Motors (GM), Winco, Caterpillar, Cummins, John Deere, Perkins, MTU and Doosan Engines. Nett Generator Silencers are compatible with these brands ...

I need your advise and help. I have purchased a metal flexi pipe from a local store and attached that with my generator"s existing exhaust muffler. I have installed my generator in my empty and abandand store room and also ...
