Fervo is leading a wave of ingenuity and technological innovation that is expanding geothermal's potential, vastly increasing geothermal energy production capabilities, and broadening project viability to previously inaccessible areas of the country.

Fervo Energy is an energy resource company focused on harnessing heat through enhanced geothermal systems (EGS). It was co-founded in 2017 by Tim Latimer, a mechanical engineer who worked as a drilling engineer at BHP until 2015. His departure from the oil and gas sector was driven by a desire to apply techniques observed during the shale revolution to geothermal extraction.
