

France portable solar system for home

Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: Why record numbers of homeowners in France are installing solar panels

How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 64,000Wh (watt crête, or 6.4 kWh), which is about 1.5x the power consumption of an average household in France.

Can you sell surplus energy if you have solar panels?

For example, you can only sell surplus energy if you have photovoltaic panels installed, as solar thermal panels do not directly produce electricity. Installation types can vary between off-grid and on-grid systems, and while some installations are on the roof, others will be on the ground in your garden.

What is the power range of a foldable solar kit?

France's DualSun has developed foldable plug-and-play solar kits with a power range of 420 W to 1.68 kW. From pv magazine France France-based hybrid solar module manufacturer DualSun has launched a new foldable solar kit for residential and outdoor applications.

How much electricity can a solar panel save?

The amount saved does of course depend on how much you are paying for electricity now, and how much sunshine your solar panels are able to use. This depends significantly on location; for example, in one year, an average solar panel will produce more electricity in Marseille (620 kWh) than in Paris (430 kWh).

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Installing solar panels makes this possible! Our solutions are designed to adapt to your situation, enabling you to take immediate advantage of your roof's solar potential.

France portable solar system for home

Home Power from the Sun: Residential Solar on the Rise. Large solar farms get a lot of attention, but residential solar panels are quietly changing the energy landscape in France. Homeowners are increasingly choosing rooftop solar systems to generate their own electricity, offering several advantages: Lower Electricity Bills: Solar panels ...
