

ZPA Smart Energy's primary industry is Electronic Equipment and Instruments. Is ZPA Smart Energy a private or public company? ZPA Smart Energy is a Private company.

Are you looking for ripple control receivers or modern measuring instruments / electricity meters developed at the highest technological level? Contact ZPA Smart Energy, the leading Czech ...

We manufacture complex electrical engineering products with an innovative approach to modern technology. Over the long term, ZPA Smart Energy has been a leading truly Czech ...

Electricity distribution, load management, metering, consumption control and optimisation. These are the main activities of ZPA Smart Energy. The products and services that we develop under our supervision, using state-of-the-art technologies and close cooperation with carefully selected suppliers, are among the absolute best in Europe.

ZPA Smart Energy a.s. @ZPASMARTENERGY Firma nabízející energetické vybavení a služby. | Vyrábíme a montujeme komplexní elektroinstalace, elektrotechniku, produkty s inovativní a moderní technologií.

Is simple electricity metering not enough for you? Do you need a device that will display and reliably store comprehensive information about the entire consumption and other point of consumption variables in real time? The smart meter from ZPA Smart Energy will become a key assistant to you.

Solar PV and biomass are to be deployed to reduce energy costs and "green" Europe's Spaceport at Kourou in French Guiana. The introduction of solar fields of up to 10MW peak is planned by the start of 2023, followed by two biomass units the same year with the intention of utilising the waste heat for cooling buildings.

ZPA Smart Energy was founded back in 1958 in Trutnov, East Bohemia. Here, the majority of our production capacity is concentrated. We apply our long-term experience in production and development activities, which we enrich with the ...

ZPA smart meters allow load profiles to be measured and stored in intervals of several minutes and provide this information to optimisation modules at all levels of the distribution system. Thanks to the adaptive predictors in smart meters, the consumption forecast is an absolutely key feature for distributed load control.

Solar PV and biomass are to be deployed to reduce energy costs and "green" Europe's Spaceport at Kourou in French Guiana. The introduction of solar fields of up to ...
