

French Polynesia solar energy solutions for agriculture

Can agrivoltaics produce electricity in France?

In the midst of the energy crisis gripping France, this farmer is using his land in innovative ways to produce electricity. Agrivoltaics - the practice of using land for both solar energy and agriculture - is on the rise across France.

How many agrivoltaic projects are there in France?

Today's announcement by the CRE of the selection of 31 new agrivoltaic projects confirms the interest of France's public authorities in this ground-breaking agricultural innovation. It also bolsters the " Cultivons Demain! " initiative, which we launched on 5 November to equip 300 French farms with agrivoltaic technology by 2025.

How much solar energy does Tse produce in France?

TSE is one of the main producers of solar energy in France. It says that the solar panels in its experiment produce 2.5 megawatts at peak times - equivalent to the energy consumed by 1,350 people. It is scheduled to be connected to the power grid in early December.

Who uses Sun'Agri agrivoltaic technology?

In addition, two successful projects by the independent electricity producers Générale du Solaire and Samsolar will also use Sun'Agri's technology, with Sun'Agri in charge of agrivoltaic system design and panel control during the entire period of operation.

Renewable energy generated on farms can be used to cover the company's own needs, and surplus energy can even be sold as a commodity unit to the utility grid. Turn-key solutions ...

Raiatea, another island in the Society Islands archipelago, is becoming a key location for solar energy, particularly for marine and agricultural businesses. As a hub for sailing and yachting, ...

"The aim was to be able to meet France's needs in terms of renewable energy development, without pre-empting agricultural land," says Xavier Guillot, head of agronomy research and development...

Raiatea, another island in the Society Islands archipelago, is becoming a key location for solar energy, particularly for marine and agricultural businesses. As a hub for sailing and yachting, Raiatea has a strong need for energy in maritime operations, and solar power offers an efficient solution to reduce fuel consumption for both land-based ...

The French Energy Regulatory Commission (CRE) has just announced the results of its third call for tenders for "innovative photovoltaic solar energy". Of the 31 successful projects, 72% were agrivoltaic systems, ...

French Polynesia solar energy solutions for agriculture

"The aim was to be able to meet France's needs in terms of renewable energy development, without pre-empting agricultural land," says Xavier Guillot, head of agronomy ...

Akuo has teams present in New Caledonia, French Polynesia, Kingdom of Tonga, New Zealand and Australia, which provide in-house support along the whole value chain of renewable ...

Solar inverter manufacturer SMA will supply German grid operator TransnetBW with feed-in data from regional power installations to alleviate grid bottlenecking issues as home-consumption and ...

Solar inverter manufacturer SMA will supply German grid operator TransnetBW with feed-in data from regional power installations to alleviate grid bottlenecking issues as ...

Discover Agri-PV (Agrivoltaics), the innovative dual-use solution combining agriculture and solar energy production. Learn how Netafim's expertise in precision irrigation, agronomic support, ...

The French Energy Regulatory Commission (CRE) has just announced the results of its third call for tenders for "innovative photovoltaic solar energy". Of the 31 successful projects, 72% were agrivoltaic systems, including 22 that used Sun"Agri's technology, a ground-breaking innovation for adapting agriculture to climate change.

Discover TSE's agrivoltaic solutions, combining solar energy production and sustainable agricultural practices. Maximize your returns while contributing to the energy transition.

Renewable energy generated on farms can be used to cover the company's own needs, and surplus energy can even be sold as a commodity unit to the utility grid. Turn-key solutions developed by NEOSUN Energy specialists for agricultural enterprises and farmers will help your brand to become more sustainable and profitable.

The French Energy Regulatory Commission (CRE) has just announced the results of its third call for tenders for "innovative photovoltaic solar energy". Of the 31 ...

Perfect conditions for a large-scale stand-alone grid: the Reao atoll in French Polynesia is located in the middle of the South Pacific, 1 350 kilometers away from Tahiti. Each day the 324 ...

Discover Agri-PV (Agrivoltaics), the innovative dual-use solution combining agriculture and solar energy production. Learn how Netafim's expertise in precision irrigation, agronomic support, and sustainable energy systems can transform your farm with ...
