

Will Morocco set up an electric vehicle battery plant?

RABAT, June 1 (Reuters) - Morocco's government and China-based battery maker Gotion High Tech have agreed to look into setting up an electric vehicle battery plant in the kingdom with up to \$6.3 billion in eventual investment, Morocco's investment agency said.

Will Morocco invest \$6.3 billion in a battery plant?

Our Standards: The Thomson Reuters Trust Principles. Morocco's government and China-based battery maker Gotion High Tech have agreed to look into setting up an electric vehicle battery plant in the kingdom with up to \$6.3 billion in eventual investment, Morocco's investment agency said.

Are EV batteries growing in Morocco?

Demand for EV batteries is growing outside and within Morocco, where Citroen has a production capacity of 50,000 supermini electric cars. Last year, the automotive sector topped Morocco's industrial exports with 111 billion dirhams (\$11.1 billion), up 33% from last year.

Will Morocco build a lithium refinery & cathode plant?

Morocco gained a further boost on Sunday after South Korea's LG Chem and China's Huayou Cobalt said they would build a lithium refinery and cathode materials plant in the country.

How will Morocco benefit from China's battery industry?

Morocco is starting to benefit as a bridge between Chinese companies and western markets as countries race to build battery industries that will determine the future shape of the automotive and clean energy sectors.

Is the Mont Tropic underwater lithium deposit a threat to Morocco?

The Mont Tropic underwater lithium deposit, located near the border with Mauritania and the Canary Islands, is believed to be one of the largest strategic mineral reserves in Africa. Exploiting it would require mining groups prepared to take high geopolitical and environmental risks, even if these would necessarily be shared with Moroccan groups.

The power storage inspection shows that the GEN24 Plus inverters and the BYD Battery-Box Premium are perfectly matched and achieve very high efficiency values compared to other storage systems. The Fronius Primo GEN24 6.0 Plus hybrid inverter achieves first place with the BYD Battery-Box Premium HVS 7.7 in the 5-kWp category with an SPI of 92.2%.
