

Gabon intec energy

What makes INTEC a global leader in EPC services?

With over a decade of success, INTEC has evolved into a global leader in EPC Services, boasting a proven 3.1 GW track record. Our focus on green energy drives us to go further, now offering comprehensive Project Development services and investing in New Energy Solutions.

Who is Intec energy solutions?

INTEC Energy Solutions opens a new office in Mauritius to Shape the future of energy in a dynamic, global environment. INTEC offers exciting opportunities to make a real difference. #teamintec © 2024 INTEC Energy. All Rights Reserved.

What type of electricity does Gabon use?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power?

Is biomass a source of electricity in Gabon?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What does Intec do?

INTEC offers end-to-end EPC services, ensuring seamless project execution from conception to completion. INTEC combines the latest battery and inverter technology with best-in-class engineering capabilities. INTEC provides strategic insights and expert guidance, ensuring the development of enduring turnkey solutions.

Gabon: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The crude oil output in Gabon steadily increased in recent years, reaching 226,000 barrels per day in the first quarter of 2024, up from 214,000 b/d and 205,000 b/d in 2023 and 2022, respectively. The main reason behind this growth is the production kickoff from the Hibiscus/Ruche project adding 20,000 b/d between between 2023 and early 2024.

2 ???· VAALCO Energy has contracted Borr Drilling affiliate Borr Jack-Up XIV for a campaign offshore Gabon during 2025-26. This will comprise multiple development wells, appraisal/exploration wells and workovers, with options to drill additional wells.
