

German solar power installation wages

How much does solar power cost in Germany?

According to research institute Fraunhofer ISE, solar power has become the cheapest mode of power generation also in Germany. Depending on the type of installation and sunshine intensity at a given location, generating one kilowatt hour (kWh) with solar panels may cost no more than 3.7 eurocents, Fraunhofer ISE found.

How many people use solar power in Germany?

As of 2021, the solar power industry employed about 58,500 people in the country, according to data by Germany's Federal Environment Agency (UBA). In 2023, lobby group BSW Solar said it expects a "lasting solar boom" in the country.

How many full load hours can solar panels deliver in Germany?

Fraunhofer ISE says solar panels achieve up to 980 full load hours per year in Germany, meaning about ten percent of the year - or less than half of the amount that wind power can deliver. The researchers estimate that 1,030 full load hours are possible in the country.

Do solar panels contribute to Germany's Power Mix?

Solar arrays can contribute a much greater share to the German power mix during particularly sunny times. On 7 July 2023, solar power reached its highest output ever in Germany so far, providing 68 percent of the entire electricity mix at about noon, when both sun intensity and usually also power consumption are at peak levels.

When did solar power reach its highest output in Germany?

On 7 July 2023, solar power reached its highest output ever in Germany so far, providing 68 percent of the entire electricity mix at about noon, when both sun intensity and usually also power consumption are at peak levels. Throughout June 2023, solar PV had an output of 9 terawatt hours (TWh), according to research institute Fraunhofer ISE.

What happened to the German solar power industry in 2016?

The effects on the German solar power industry were harsh: Many major players, such as Q-Cells, Solon and Conergy - which often had just invested large sums of money to ramp up production - were forced to close down. As a result, the number of jobs plummeted to just over 45,000 in 2016.
