

Ghana perfect energy solutions

What is the Ghana energy transition & investment plan?

H.E. Nana Akufo-Addo launched the Ghana Energy Transition and Investment Plan on 21 September 2023 during the UN General Assembly. The plan marks Ghana's commitment to fighting climate change and fostering economic development in tandem.

Can Ghana decarbonise the energy sector?

By Edward Acquah Accra, May 27, GNA- As the world races to transition from fossil fuel to renewable energy, Ghana has developed a National Energy Transition Framework (2022-2070) to decarbonise the energy sector to help achieve net zero targets as part of commitments under the Paris Agreement.

Will Ghana achieve net zero by 2060?

If the plan is achieved in full, it would generate 400,000 net jobs within Ghana's economy. The country's existing Energy Transition Framework previously set a target of net zero by 2070, but this new plan shows Ghana has increased its ambition and is targeting net zero by 2060. Various sectoral changes and technologies are proposed in the plan.

Will natural gas be part of Ghana's energy mix in 2022?

Speaking at the 2022 Ghana International Petroleum Conference (GhIPCon) in Accra in September 2022, Vice President Dr Mahumudu Bawumia said natural gas would continue to be part of Ghana's energy mix in the short term as the country takes steps to fully transition from fossil fuels to renewable energy by 2070.

How can Ghana produce healthy food for a healthy population?

Enhancing Sustainable Land Management, Permaculture, AgroEcology and solutions to protect the environment while improving yield of crops for small holder farmers in Ghana is key to producing healthy food for a healthy population.

What will Ghana do in 2040?

By 2040, Ghana intends to scale up nuclear power in the electricity generation mix; adopt carbon capture, usage and storage (CCUS) for electricity generation, Oil and Gas and Industries; introduce sustainable aviation fuel (Biofuel for aviation kerosene), and phase out fossil liquid fuel for electricity generation.

It details a credible pathway for how Ghana can achieve net-zero energy-related carbon emissions by 2060 through the deployment of low-carbon solutions across key sectors ...
