

What is the Bess consortium?

The BESS Consortium is a multi-stakeholder partnership set up to ensure these BESS benefits transform energy systems across low- and middle-income countries (LMICs). The Consortium is on track to meet its target of securing 5 GW of BESS commitments by the end of 2024 and deploying these by the end of 2027.

Why is Barbados partnering with the Bess consortium?

Barbados is committed to playing a leading role in urging concrete deliverables on climate and climate financing. We are here with the BESS Consortium today because we support their efforts to improve access to battery energy storage systems as part of the energy transition in countries like ours.

How can the Democratic Republic of Congo become a Climate Solutions country?

To Become a Climate Solutions Country, the Democratic Republic of Congo Must Strengthen its Institutions and Increase Investments Share more close linked in digg renren stumble upon delicious sina

Why is mobilization needed in the Democratic Republic of the Congo?

Mobilization at the national, regional and international level are needed to support the Democratic Republic of the Congo (DRC) in the face of continued violence in the east, trafficking of natural resources, and other challenges, the UN Security Council heard on Monday.

Is Congo a corrupt country?

Congo is seen as one of the most corrupt countries on Earth, ranking 162 out of 180 in Corruption Perceptions Index, according to the NGO Transparency International. In Kolwezi, hundreds of thousands of people survive by prising ore out of the ground with rudimentary tools such as spades and picks.

Is Congo a rich country?

But Congo remains the true prize. The impoverished and unstable country has staggering mineral wealth, with some of its richest deposits concentrated around Kolwezi. More than 70% of the world's cobalt, a critical metal used in electric-vehicle batteries and jet engines, comes from Congo, for example.

The adoption of grid-scale BESS solutions in DR Congo is still in the early stages, with a limited number of pilot projects exploring the feasibility and benefits of BESS technology. One such pilot project is the installation of a lithium-ion battery storage system in ...
