Today, through its strategies and investments, the UAE is leading global efforts in renewable and clean energy sectors. The UAE Energy Strategy 2050 aims to achieve an energy mix that combines renewable and clean energy sources to balance economic requirements and environmental goals.

Full implementation of the landmark energy goals established at the COP28 climate conference in Dubai last year would drive down greenhouse gas emissions and significantly accelerate the transformation of the global energy sector, according to a new IEA report that can serve as a guidebook for turning countries' collective pledges into action.

The report identifies three key pillars that form the foundations for the actions needed to realign the global energy transition with climate objectives: building the necessary infrastructure; advancing a policy and regulatory architecture that can facilitate targeted investments, and improve socio-economic and environmental outcomes; and the ...
