Exagen Group is passionate about renewable energy and its role in driving down greenhouse gas emissions. In partnership with like-minded landowners, they specialize in building and managing utility scale-solar farms co-located with grid-balancing battery storage technology.

Our end-to-end approach means Exagen are on the ground every step of the way, developing, building and operating with the future in mind. Using in-house technology to inform and streamline each development phase, we minimise risk and maximise production to ensure our projects benefit business, the environment and community life for years to come.

Octopus said it manages nearly 7 billion pounds (\$9.4 billion) of renewable energy projects worldwide and the Exagen acquisition will help it contribute to Britain's low-carbon energy transition

Octopus Energy Generation has completed the full acquisition of UK-based renewables and energy storage

Guatemala exagen group

developer Exagen Group from its founder, Jeremy Littman. Exagen's development pipeline features more than 2.4GW of solar and energy storage initiatives throughout England.

The unique strengths and values of Exagen are replicable globally and this drives our overseas ambition. We're excited to see the amplification of our mission into new markets in the near future. The energy market is undergoing significant change, partly driven by economic and geopolitical events but also by government to achieve net zero ...
