

Harvest solar Bolivia

Why should you choose harvest solar?

At Harvest Solar, we specialize in designing and installing state-of-the-art solar solutions that not only reduce your carbon footprint but also save you money on your energy bills. Our team of experienced experts is committed to delivering top-quality solar panels and systems tailored to your specific needs.

Who is harvest solar?

We've been engineering and installing solar for 14 years. In a market full of fly-by-night solar companies, Harvest Solar has been a family-owned and operated industry leader for 14 years. We've been trusted to design, install, and service thousands of ag, commercial/industrial, and EPC businesses across the Midwest.

How does harvest solar work?

The local utility and municipality will need to give final permission for Harvest Solar to connect your panels to the grid and start generating clean energy. This is called Permission to Operate (PTO), and once your panels are ready to be turned on, the savings will start rolling in!

In 2017, the state of Illinois passed the Future Energy Jobs Act, which called for a significant increase in new solar energy development. This program will offer payments to qualifying projects for the RECs that the system produces over a 15-year contract.

Specialties: Solar energy solutions for commercial, industrial and agricultural use. Whether residential, commercial or agricultural solar power, we can help meet your energy needs by delivering the highest quality product and service possible.
