

Which institutions have backed Hive Power?

Hive Power is backed by some leading institutions. Gianluca Corbellini, the CEO and co-founder of Hive Power, holds a master's in Mathematical Engineering from Politecnico di Milano. Hive Power is a SaaS which enables companies to manage anything connected to the grid, from Energy Communities to EV Charging.

What if Cambodia had a power plant?

If it were functional today, the Electricity Authority of Cambodia (EAC) estimates the facility would account for 18% of the country's total generation capacity and produce 26% of the nation's energy output. "Royal Group's power plant is also noteworthy for being Cambodia's first gas-fired power plant," added Pianka.

What is Cambodia's largest power plant?

The gas-fired power plant will feature two combined cycle F-class generation units, each with a capacity of 450MW, making it Cambodia's largest power project to date. Commercial operation of the first unit is expected by April 2027.

Can solar power help Cambodia achieve national electrification goals?

Searching for alternative options, Cambodia joins a growing list of national governments who have come around to seeing solar and other distributed, emissions-free renewable energy resources as a cost-effective means of achieving national electrification, as well as national and international climate change and renewable energy goals.

Is KT/Chor sokunthea Cambodia's largest power plant?

KT/Chor Sokunthea Cambodia marked a significant milestone in its energy transition yesterday with the groundbreaking of a \$1.34 billion gas-fired power plant in Koh Kong province, poised to become the nation's largest power-generation facility.

Does Cambodia have solar power?

Solar power capacity has been on a sharp ascent in Cambodia recently, increasing at a 10% annual rate from less than 1% of national generation capacity, however. Some 400-MW of solar-fueled power capacity is now connected to the national grid, according to the Department of Mines and Energy.

Hive Power, a leading supplier of innovative solutions for smart grids, has partnered with Haier Europe to revolutionise the way we manage and consume energy within energy communities. ...

Based in Switzerland, Hive Power is a leading provider of innovative solutions for smart grids. We are a team of researchers and scientists with deep expertise in smart grids, data science, and optimisation. We share a long experience in research and pilot projects on decentralised energy management. Our Vision - Smarter Grids

Hive power Cambodia

Based in Switzerland, Hive Power is a leading provider of innovative solutions for smart grids. We are a team of researchers and scientists with deep expertise in smart grids, data science, and optimisation. We share a long experience in ...

Information on valuation, funding, cap tables, investors, and executives for Hive Power. Use the PitchBook Platform to explore the full profile.

The power sector is facing a paradigm change, moving from a centralized approach with big power plants (hydro, coal, gas and nuclear) leading the energy market to a decentralized scenario...

Hive Power Founders Gianluca Corbellini (CEO) and Davide Rivola (COO) Funds will bolster the startup's efforts to build smart charging, energy community, consumer coaching, and other...

Cambodia relies on three main sources for electricity: hydroelectric power plants for more than half, a total maximum capacity of 1,329 MW as of last year, coal power stations of 538 MW, and solar energy of 64.77 MW, according to the ministry.

Based in Switzerland, Hive Power is a leading provider of innovative solutions for smart grids. We are a team of researchers and scientists with deep expertise in smart grids, data science, and ...

Cambodia relies on three main sources for electricity: hydroelectric power plants for more than half, a total maximum capacity of 1,329 MW as of last year, coal power stations of 538 MW, ...

Explore the power of multi-objective smart charging for V1G, V2G and V2X. Energy Aggregation Offer demand response with distributed devices across, cities, regions or countries.

The power sector is facing a paradigm change, moving from a centralized approach with big power plants (hydro, coal, gas and nuclear) leading the energy market to a ...
