Will a wind farm deliver a third of the Isle of Man's electricity needs?

Plans to build a wind farm capable of delivering around a third of the Isle of Man's electricity needs by 2026 are on schedule. Manx Utilities updated the Council of Ministers last week and outlined potential sites for the 20MW windfarm, alongside plans to install 10 Megawatts of solar on public buildings.

How will the Isle of Man generate electricity?

Plans to generate about 75% of the Isle of Man's electricity through solar and on-shore wind projects have been backed by the Council of Ministers. Manx Utilities (MU) will look to install solar panels on public car parks and government buildings. Wind turbines could also be built on public land to create 30MW of electricity by 2026.

Will Manx Utilities invest in wind turbines?

Two sites are identified for wind turbines as part of Manx Utilities' move toward renewable energy.

How fast should a windfarm be on the Isle of Man?

Wind speeds must be  $\geq 6$  m/s to ensure the windfarm is commercially viable. Typically on the Isle of Man these are all upland areas. Wind turbines must be located a minimum of 500m from the nearest property in line with Technical Advice Note 8 (TAN 8) (England & Wales) to mitigate noise impact.

How much electricity does the Isle of Man need?

While average electricity demand on the Isle of Man stands at 40MW, it can peak at 75MW during the winter and drop at night during summer to 25MW. MU chairman Tim Johnston said "detailed work" to determine the best approach to increase renewable energy was underway.

Will Manx Utilities build a windfarm at Earystane plantation?

With the aim of complementing the existing power system assets operated by Manx Utilities, the proposed windfarm design, at Earystane plantation, would consist of between three and four turbines which could generate more than a quarter of the Island's annual electricity needs.

Typically on the Isle of Man these are all upland areas. Wind turbines must be located a minimum of 500m from the nearest property in line with Technical Advice Note 8 (TAN 8) (England & ...

Plans have been outlined for a government-funded onshore wind farm on the Isle of Man. Two possible sites have been identified as part of a drive to produce 75% of Manx electricity through...
