

As such, it stands to gain from sustainable energy solutions that will lead Armenia towards decarbonization and energy security. Furthermore, positive steps toward climate adaptation can enhance food safety, even though some hurdles like ...

OCTG & Conductor Solutions, Offshore Exploration & Production Technologies | Integrated Energy Systems FZC (IES) is fully owned subsidiary of Integrated Energy Solutions Group. IES is...

At Integrity Energy Solutions, we provide expert consultancy services tailored to the oil and gas and renewable industries. Our offerings include thorough inspections, preventive maintenance, ...

The IEA commends Armenia for avoiding energy subsidies and for its decisive steps to implement a liberalised electricity market, which was launched in February 2022. Exposing investors and consumers to the true costs of energy supply, accompanied by a safety net for the most vulnerable customers, helps ensure efficient energy investment and use.

The IES technology harnesses the power of natural magnetism combined with advanced electromagnet systems to generate clean, sustainable electricity. Unlike traditional energy sources, our approach ensures minimal environmental impact while providing a reliable and cost-effective energy solution.

The process of development of National Program on Energy Saving and Renewable Energy 2021-2030 has already commenced taking into consideration increasing economic and energy ...

In 2021, several parallel efforts were under way to create a comprehensive policy framework for energy efficiency in Armenia.¹ The government's new National Programme on Energy Saving and Renewable Energy for 2021-2030 (adopted 24 March 2022) includes Armenia's main energy efficiency policies and targets to 2030, based on analysis of ...
